Working career

Company	
ITS Partner	March 2014 - March 2018
Belitsoft	March 2018 - till now

Professional Experience

Project	Cross-platform mobile app
Period	March 2018– till now
Project Description	App for construction company that help make audits, reports and etc. Write one source code and reusable it on mobile and web app.
Technologies	Tools and Environment: Visual studio code, Webstorm. Languages: JavaScript. Technologies: React Native, react, Node.js, redux, redux-persist, react navigation, recompose, saga, reselect, Koa, postgresSQL, knex, swagger, koa bouncer. Source control system: Git.
Role	Software Engineer.
Responsibilities	Implementation server side (Node.js + Koa + knex+ post-greSQL) Implementation front side (React, React native), Maintenance, technical requirements clarification, technical design and integration, build and deploy.

Project	Cross-platform mobile app
Period	January 2018– March 2018
Project Description	Mobile app project that work with connect insurance companies and users. And provide possibility to fine best offer.
Technologies	Tools and Environment: Visual studio code, Webstorm. Languages: TypeScript, Objective-C. Technologies: React Native, redux, redux-persist, react navigation. Source control system: Git.
Role	Software Engineer.
Responsibilities	Implementation, maintenance, technical requirements clarification, technical design and integration, build and deploy.

Project	UI for network access storage
Period	May 2017 – March 2018
Project Description	NAS (network access storage) for storing all user's data in one place: Organize photos, videos, pictures and documents. Protect them. And access and share them anytime, from anywhere. Backup photos and films from mobile phones.
Technologies	Tools and Environment: Visual studio. Languages: JavaScript, HTML5, CSS3. Technologies: Ext js 3.4.0. Source control system: SVN.
Role	Software Engineer.
Responsibilities	Implementation new UI features for NAS Build and deploy UI portal for access NAS data anywhere.

Project	Service for catching rats minks and other
Period	December 2016 – May 2017
Project Description	Project for use one source that build few single app page with different styles and modules. All of this apps intended for use api from device that catch some small animals or rat.

Technologies	Tools and Environment: WebStorm. Languages: JavaScript, HTML5, CSS3. Technologies: Reactjs + Redux, Webpack, Gulp
Role	Software Engineer.
Responsibilities	Implementation flux architecture with using redux. Write script for build multiply apps with different styles and modules and one core module. Page layout. Client side scripting.

Project	Cross-platform charity mobile app
Period	February 2017– April 2017
Project Description	Mobile app on IOS and Android for reading and participating charity events (stored on Facebook) with score system and scoreboard results.
Technologies	Tools and Environment: WebStorm, android studio, Xcode. Languages: JavaScript, HTML5, CSS3. Technologies: React Native + Redux, Node.js, Amazon Lambda, facebook sdk, Amazon api gateway. Databases: MongoDB
Role	Software Engineer.
Responsibilities	Implementation server side Node.js (Aws Lambda + api gateway). UI slicing. Integration with facebook SDK. Implementation flux architecture with using redux on client.

Project	Cross-platform mobile app working on private networks plane boards
Period	August 2016 – February 2017
Project Description	<p>Mobile app on IOS and Android for using on plane board with private network. App possibilities:</p> <ul style="list-style-type: none"> •streaming video and chatting with watchers •watching TV •watching films and serials •search hotels and apartments •display news and weather •search and rent cars.
Technologies	<p>Tools and Environment: WebStorm, android studio, Xcode. Languages: JavaScript, HTML5, CSS3. Technologies: React Native + Redux, Node.js , babel, express, firebase, wowza. Databases: MongoDB.</p>
Role	Software Engineer.
Responsibilities	<p>Implementation android video streaming. UI slicing. Implementation real-time messages chat on video stream.</p>

Project	IP TV application for streaming cable channels (available in U.S. only).
Period	May 2016 – August 2016
Project Description	Admin panel for IP TV application for streaming cable channels (available in U.S. only).
Technologies	<p>Web admin page implementation – single page application for logs browsing (pagination, filtering, hot reload):</p> <ul style="list-style-type: none"> •page layout •client side scripting •simple web API implementation.
Role	Software Engineer.

Responsibilities	<p>Online results sharing feature implementation:</p> <ul style="list-style-type: none"> •page layout •client-side scripting •server side scripting Node.js (Amazon Lambda)
------------------	--

Project	Mobile application for professional and amateur bowlers.
Period	February 2016 – August 2016
Project Description	Perfect Game is a tenpin bowling player’s assistant with powerful instruments for result analysis.
<u>Technologies</u>	<p>Tools and Environment: Visual studio code, WebStorm.</p> <p>Languages: JavaScript, HTML5, CSS3.</p> <p>Technologies: Node.js , Amazon Lambda, Amazon Cognito, Amazon Lambda S3. serverless framework http://serverless.com, gulp.</p> <p>Databases: Amazon dynamoDb.</p>
Role	Software Engineer.
Responsibilities	<p>Online results sharing feature implementation:</p> <ul style="list-style-type: none"> •page layout •client-side scripting •server side scripting Node.js (Amazon Lambda)

Project	Social network for athletes
Period	March 2014 – January 2016
Project Description	<p>Athlinks is a social network with more than 400,000 users. Backend based on .NET platform and frontend on React.js with using flux design. Data stored on three databases, sql, mongoDB and neo4j. Moreover, hangfire for working with background jobs (For example send Email messages).</p>

Technologies	<p>Tools and Environment: Visual studio, WebStorm, Microsoft SQL server management studio.</p> <p>Languages: C#, javascript, cypher(neo4j), SQL.</p> <p>Technologies: ASP.NET MVC, React.JS + flux, SignalR, Hangfire.</p> <p>Databases: MongoDB, neo4j, MS SQL Server.</p>
Role	Software Engineer.
Responsibilities	<p>Business logic implementation (C# on back end, JS on front end).</p> <p>Stored procedures implementation (MS SQL).</p> <p>ASP.NET views migration to React.js.</p> <p>3rd party services integration: Google GeoCode, Forecast.IO, gigya.</p>
